

# NEQ Talks - QUARREE 100

Graduate School  
for Sustainable Energy Systems  
in Neighbourhoods

**Development of a sustainable and economical energy supply for cities and municipalities**

**Jana Rasch** *Entwicklungsagentur Region Heide*

**Ilka Hoffmann** *FH Westküste*

**Anne Nieters** *Fraunhofer IFAM*

One of the goals of a resilient energy system is to ensure regional supply stability - even in extreme situations and other uncertainties. Since this can conflict with a purely efficiency-driven solution, the QUARREE100 project in the Heide region aims to identify and model the optimal balance between energy efficiency and supply security. We are pleased that Jana Rasch from the Heide Region Development Agency will give us an understanding of the project, which is funded in the Solar Building / Energy Efficient City funding initiative. She will report from practical experience on the technical and non-technical implementations that are being realized, tested and investigated in the neighborhood and how citizen energy societies contribute to its success.

**October 28<sup>th</sup> 2021**  
**6 to 7:30 pm**
